

Environmental Policy

The Plastic Surgeon Ltd recognises that its products and services have an impact on the environment and is committed to minimising this impact throughout their life cycle, wherever reasonably practicable, by pursuing best environmental practice.

The Plastic Surgeon Ltd will therefore:

- (i) Maintain a process to assess the environmental risks and impacts arising from its activities and ensure that suitable control measures are used to protect the environment and prevent pollution.
- (ii) Set objectives and quantitative targets to drive continual improvement in environmental performance and prevention of pollution and will review these to ensure that they stay relevant.
- (iii) Communicate these objectives to employees and other interested parties.
- (iv) Establish improvement programmes and delegate responsibility for delivery of objectives.
- (v) Regularly review progress towards achievement of objectives and publicise the outcome on an annual basis.
- (vi) Provide training and education for employees in order that they understand the policy and objectives and can perform safely, efficiently and with minimum harm to the environment.
- (vii) Ensure that all sub-contractors operate in line with the principles of this environmental policy.
- (viii) Identify and record all environmental legislation, industry codes of practise and other obligations applicable to the organisation and ensure compliance.
- (ix) Cooperate openly with neighbours, the general public, government, regulatory authorities, and all other interested parties.

Plastic Surgeon commits to comply with all applicable requirements of the ISO 14001:2015 standard and to the continued improvement of the management system.
