

Sustainable Solutions

Zero landfill waste is becoming an increasingly important target for the construction and house build industry.

This way of working sits seamlessly with our repair-first approach, which encourages all within the industry to repair items damaged on-site before considering a replacement option.

It's our mission to make saving landfill waste easy. All our repairs are logged and tracked using our unique Visibility reporting platform so we can provide a detailed breakdown of repairs and savings.

SUSTAINABILITY FIGURES 2024

Every year, we save our clients in excess of **3,800** tonnes of waste from landfill

We have saved **149,103** items from landfill

Our nationwide team completes over **1,000,000** individual repairs annually
